

**BRINGING CONTROL
TO YOUR FINGERTIPS**

"Design, install, and maintain
- we do it all"

Solution Provider for Your Applications

Vision

Dedication, transparency, and hard work on behalf of our clients. We offer PLC automation, electrical control panels, and instrumentation solutions for a wide range of applications including automobile paint booths, textile machinery, food processing, conveyor automation, oil and gas, and many more.

About US

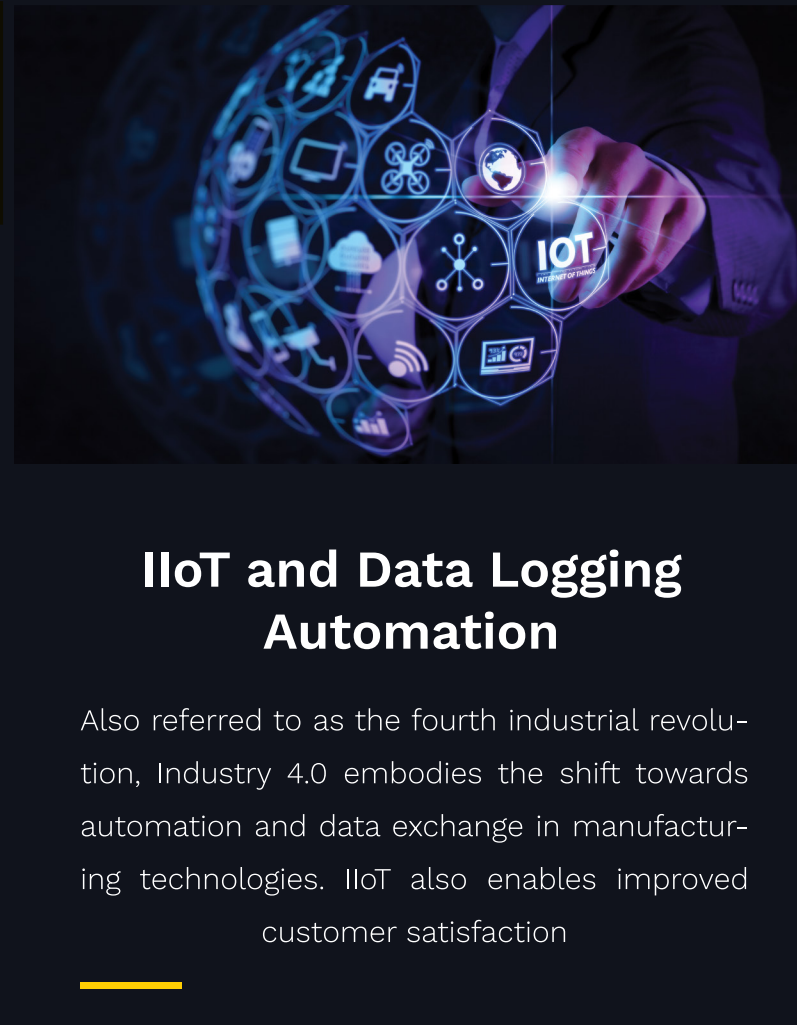

Lakshmi Hamsa Systems is a manufacturer and supplier of high-quality control panels for a variety of applications from 2015. We are expertise in creation of excellent collection of nearly all types of industrial SPM panels. Various PLC panels, APFC panels, variable frequency drive (VFD) panels, power distribution boxes, and lighting panels are available.

Going beyond in-depth knowledge and professional experience for industrial applications, we provide an extremely efficient solution for industrial applications.

Mission

"We will provide fulfilling technical solutions to our customers, thereby achieving profitable growth"

IIoT and Data Logging Automation

Also referred to as the fourth industrial revolution, Industry 4.0 embodies the shift towards automation and data exchange in manufacturing technologies. IIoT also enables improved customer satisfaction

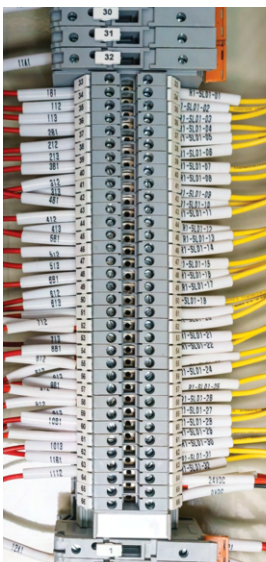

Heater & Oven Panel

An industrial oven is a device used to generate high temperatures for heat treating parts, conditioning metals, and curing metal coatings. The two main types of industrial ovens are continuous and batch. As the term 'batch' implies, batch industrial ovens treat large numbers of parts simultaneously. Continuous industrial ovens are typically part of mass production and may include heating and cooling functions.

Conveyor Control Panel

The primary function of a conveyor system is to transport objects from one location to another. This design facilitates the movement of items too heavy or bulky for manual carrying.

PLC & VFD Panel

We are a recognized organization engaged in manufacturing and supplying a comprehensive range of PLC Panels, integrated with PLC, HMI, Barriers, VFD, and SERVO, etc. PLCs from Siemens, AB, Mitsubishi, ABB, Delta, etc. are Customized as per requirements.

APFC Panel

Industries are heavily dependent on power for their machinery. As per the increases of industrial load, the demand of power will be increased. However, they often fail to utilize the supplied power effectively and end up drawing more power. Which leads to higher bills and penalties. By implementing APFC panels in their industrial premises, they can utilize power more efficiently.

Motor Control Centre (MCC) Panel

We possess extensive expertise in providing a comprehensive range of Motor Control Centers. Manufactured at our state-of-the-art production facility, these Motor Control Centers adhere to industry norms and guidelines for quality and performance. Used in diverse industrial applications for power control systems, our products have gained high popularity among clients. Furthermore, they are available at industry-leading prices for our valued clients.

Mixer Plant Control Panel

A concrete mixer is a device that homogeneously combines cement, aggregates like sand or gravel, and water to form concrete.
